Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale, and use. Packaging also refers to the process of designing, evaluating, and producing packages. Packaging can be described as a coordinated system of preparing goods for transport, warehousing, logistics, sale, and end use.

Microfluidics has expanded beyond merely micro to nanoliter fluid handling, now incorporating a multidisciplinary approach to encompass a wide range of applications [1, 2]. The small scale of microfluidics provides a means to implement highly controllable, reproducible, and scalable fabrication methods for nanoparticle production compared to conventional methods.
