Getting to Know ArcGIS Pro: Michael Law, Amy Collins

Mapfile Structure¶. This is what the mapfile looks like: Example1-1.map. The MAPFILE is MapServer's™ basic configuration mechanism. It is made up of "objects" and each object can have keywords or other objects. It has a hierarchical structure such that some objects fall under other objects... on top of this hierarchy is the MAP object, all other objects belong to it.

A receiver operating characteristic curve, i.e. ROC curve, is a graphical plot that illustrates the diagnostic ability of a binary classifier system as its discrimination threshold is varied.. The ROC curve is created by plotting the true positive rate (TPR) against the false positive rate (FPR) at various threshold settings. The true-positive rate is also known as sensitivity, recall or ...
